# Metallics

Give your walls a metallic tint with Metallics by Royale Play. You could use one of our six effects to create opulent texture. Choose from shades of gold, silver and copper and combine them with one of our wide range of metallic colour combinations to create a stunning look.

Silver for a young, urban look that's soft and adventurous at the same time. Use it in an office space, a recreational place or on neutral walls to give more energy to the room.

Gold symbolises rich, formal opulence. It creates a world that is warm and formal at the same time. And even the bling and chic effect. Gold can be used well in living rooms and dining rooms.

Copper is the latest rage in metallic shades. It's a warm and intimate tone that adds elegance to a room. Use it in dining areas and bedrooms for an environment that is stylish, yet personal.

Coloured Metallics is a unique concept. Its gold or silver tints create subtle shades that add a special lustre to your walls.

The gold tint is a subtler version of the traditional gold paint. The silver tint is a soft, fresh shade that has a sheer finish. The perfect make-over for any room.
