INTERIOR COLOUR COMBINATIONS

*'Colours are the smiles of Nature' – Leigh Hunt*

Colours give the essential character to any space, be it a living room or kitchen, bedroom or a lounge. Colours help to define a space before any other element of décor is chosen. They can also make a space appear large or small, relaxed or energetic - again hinting at what activity it invites the most. Long known for their power to influence moods and emotions, colours also help in making us feel healthy and energetic every day.

In this first of its kind guide from Asian Paints, we have illustrated how you can achieve striking effects in every room by using the right combinations. Here's where you'll find 7 unique combinations for each colour family to choose from. You can compare and see how the same room setting looks distinctly different with deeper, medium or lighter tones of the same colour family.

A total of 71 colour combinations are waiting to be discovered by you in these pages.

Wishing you a journey of fresh discoveries. Happy painting!
