KADISCO ADADUR PU HARDENER

DESCRIPTION:

KADISCO ADADUR PU HARDENER is an aromatic polyfunctional isocyanate in solvent (ethyl acetate) deriving from reaction between a mixture of polyols and polyfunctional isocyanates.

USES

It is an activating agent for two component PU or two component polychloroprene adhesive.

The result obtained from the reaction between PU adhesive and ADADUR PU in the given percentage is a product with resistance to heat, to getting old, and in some cases it increases the performances on particularly difficult materials. It also gives better bonding to PU, nylon and natural and synthetic fibres.

PROPERTIES:

Appearance	Transparent Liquid
Specific Gravity	0.8 approx.
Package	Available in 0.5ltr & 1ltr cans.

INSTRUCTIONS FOR USE

Adding 2-5% in weight of ADADUR PU to PU adhesives (KADIFIX II) or two-component polychloroprene adhesives.

Shelf life of the mixture is 2/4 hours according to the percentage of hardener used and the environmental conditions.

Due to its particular composition, it is not considered toxic or harmful.
